

## **GBK CIO Audit Report 2017/18**

The accounts show the incoming donation from the predecessor GBKA association, the purchase of the apiary site at Llanfair Cross and the professional fees involved in gaining planning permission for the teaching apiary building. Excluding the 3 exceptional donations for the year, income was £13.6k and normal expenditure was £9.5k.

There was an audit issue on the withholding of membership information which was resolved by the transfer of responsibility back to the Treasurer and I am satisfied there are no material errors in the account resulting from this.

All the officers and trustees of the charity recognise that converting to CIO status and applying for grant aid to construct the apiary building requires an open and professional approach to the charity's activities.
