Trustees Report

26th October 2021

COVID-19 has created a perfect storm for charities worldwide, as major swathes of income have been lost, demands on services have increased and some are unable to run at all because of imposed limitations.

Nonetheless the untold stories of COVID, we were expectant to have a great year base on our previous performance but the Covid pandemic eroded all our prospects. Last year Glucorx donated about £15000 worth of blood glucose monitors with strips. This year has been a total drought with no donations or income as a direct result of the Covid pandemic

There are tough decisions ahead, with so much demand, so little money and resources, we are having to look at what we can continue doing to achieve our mission which is to provide education on prevention, early diagnosis and access to treatment of diabetes in the UK and worldwide.
